INTRODUCTION

With the all-new GDS, you have OE-level access to Domestic, European and Asian manufacturers, for read/clear codes, live data graphing and recording, Bi-directional testing and Module Coding. The GDS offers unrivaled speed in the access and communication of all vehicle systems and their modules. Boot-up and navigation, as well as diagnostic procedures are performed ultra-fast and with superior coverage, both in depth and breadth. The GDS is also WiFi enabled, allowing you access to your favorite websites for troubleshooting advice, charts, and repair information.

Adding to the list of new features is a one-button update which allows you to update one or more car lines with the simple push of a button. Gone are the days of waiting for seasonal updates, or for the tool man to load software into your scan tool. The GDS allows you to do this right on the fly without having to connect to an external PC. Separate modules for a 4 Channel Oscilloscope, Ignition Analyzer, Sensor Simulator and Multimeter are also available.

Simultaneously Graph Up To
4 PID's of LIVE DATA In Full Color!

Optional Modules* Available For:

- BATTERY ANALYZER AND TESTER
- OSCILLOSCOPE WITH IGNITION ANALYZER
- SENSOR SIMULATOR

Quick & Easy Access To The
ALLDATA® Repair
Database!***
